

Trial Online

CLINICAL TRIAL SOFTWARE SERVICES

Secure, cost effective and powerful EDC and ePro services used in clinical trial world wide

Since 2000 Trial Online EDC has been a trusted eCRF provider for thousands of studies.

In 2016 Trial Online ePro was launched to provide Patient diary and questionnaire service to clinical studies.

Trial Online is owned, developed and qualified by Replior AB.

Why choose Trial Online as your EDC & ePRO provider?

Appreciated for its ease of use and cost effectiveness

Trial Online is used globally in all types of clinical trials (I-IV) suitable for both NIS and Investigator initiated studies

Webbased:

No special hardware or software is required to run the service, which utilizes standard internet browsers.

Hosting and backup included:

Trial Online is provided as a SaaS (Software as a Service) solution on a server dedicated to the client. The server is managed and hosted by Replior and is easily upgraded with more power if needed. Backup is done once every 24h with IBM TSM and include a Disaster Recovery image.

Fast and easy data collection with Trial Online EDC:

All Trial Online activities are managed online and offer a modern and easily accessible platform for all involved in a study. No special hardware or software is required to run the service, which utilizes standard internet browsers.

Since the start-up time and creation of electronic Case Report Forms is very short, Trial Online can be used for all trials, regardless of size.

Better data faster with Trial Online ePro:

Trial Online ePro lets you run the trial you want, and not the trial your system allows you to. Assign defined user roles for an easier management, and automatic notify user about specific events. Divide questionnaires into time and date defined events, and get better insights faster.

A safe and compliant system:

Trial Online is a designed, developed, and tested computer system as defined in PIC/S 'Good Practices for Computerised Systems In Regulated "GxP" Environments'. And Trial online is of course compliant with FDA CFR 21 Part 11.

Quality is the heart of everything we do:

The Quality Management System is built on quality standards in the industry, e.g. guidelines and directives provided by ISPE, FDA and EMA.

Replior and Trial Online are audited regularly by its clients (regulated companies).
